

Welcome to farmOTT, powered by Ittiam Media Labs

In this week's digest, we cover administrative capabilities that comes as part of farmOTT - User Management & Roles.

farmOTT User Management capabilities

User Management and Roles is an integral feature of farmOTT. Roles and permissions enable organizations to define the user's ability to perform actions based on his(her) responsibility and privileges within the system. A User with administrative (admin) privileges can add, block/unblock and delete user.

What are Roles?

Role defines the responsibility given to each user, and the actions he(she) can perform. It limits the actions to be executed by the user. Manager, Content Uploader, Content Moderator are the roles provided by farmOTT as of today. Manager has full control over the publisher account, Content Uploader has access to content ingest and management capabilities and a Content Moderator has access to Content Moderation Panel.

How to add Users?

Anyone who subscribes to farmOTT is classified as a Publisher. A Publisher has full admin privileges. A User with such administrative privileges can add users and associate roles under the User Settings Section. Each User Created will have separate login to farmOTT with defined responsibility.

What are you waiting for?

Subscribe to farmOTT and explore User Management and Roles. To Login, visit <https://transcode.farmott.com/farmott/> with user name and password provided to you.
